Comprehensive Community Services Funding

Decision Needed

Should the Department request statutory changes to allow the Department to provide the non-federal share of Medicaid payments for Comprehensive Community Services (CCS) to counties that provide these services on a regional basis approved by the Department?

Background

1. Wisconsin counties are responsible for the provision of mental health services to their residents. These services include Community Support Programs (CSP), Crisis Intervention Services, Comprehensive Community Services (CCS), and Community Recovery Services (CRS). Medicaid reimbursement is available for individuals enrolled in Medicaid. Counties are responsible for the non-federal share of the Medicaid payment for these programs.
2. The Department has a number of initiatives to encourage counties to regionalize the delivery of mental health services. Regionalization will enable more efficient use of resources and more uniform service delivery and quality. To further encourage regionalization, the Department requests statutory changes to allow the Department to provide both the non-federal share and the federal share of the Medicaid payment to counties providing CCS on a regional basis. Counties that do not regionalize would receive only the federal share, as under current law.

Current Language

s. 49.45 (30e) (c) *Provider reimbursement.* A county that elects to make the services under s. 49.46 (2) (b) 6. Lm. available shall reimburse a provider of the services for the amount of the allowable charges for those services under the medical assistance program that is not provided by the federal government. The department shall reimburse the provider only for the amount of the allowable charges for those services under the medical assistance program that is provided by the federal government.

Proposed Change

s. 49.45 (30e) (c) *Provider reimbursement.*

1. A county that elects to make the services under s. 49.46 (2) (b) 6. Lm. available shall reimburse a provider of the services for the amount of the allowable charges for those services under the medical

assistance program that is not provided by the federal government. The department shall reimburse the provider only for the amount of the allowable charges for those services under the medical assistance program that is provided by the federal government.

2. Notwithstanding subd. 1, the department shall reimburse the provider for the amount of the allowable charges for those services under the medical assistance program in counties that elect to deliver the services under s. 49.46 (2) (b) 6. Lm. on a regional basis according to criteria established by the department.

HEALTH AND HUMAN SERVICES

MEDICAL ASSISTANCE

Under current law, DHS administers the Medical Assistance (MA) program, under which eligible low-income individuals or families receive health care benefits, and low-income elderly or disabled individuals receive health care benefits or long-term care services. Generally, benefits provided under MA are paid for partially by the federal government and partially by the state. One of the benefits provided under MA is psychosocial services provided by the staff of a community-based psychosocial service program. This benefit, however, is available to a recipient under MA only if the county in which the recipient resides elects to make this benefit available under MA, in which case DHS reimburses a provider for the portion of the allowable MA charge that is provided by the federal government and the county must reimburse the provider for the remainder of the allowable MA charge. This bill provides that if a county delivers this MA benefit on a regional basis, DHS will reimburse a provider both for the allowable MA charge that is provided by the federal government and for the remainder of the allowable charge.
